KVB-15 VIBRATING HOPPER

Overview

The Armbruster KVB-15 is an all stainless steel vibrating hopper with a hydraulic ram to aid in feeding the contents by way of tipping onto a sorting line or destemmer with very gentle handling of fruit.

Key Features

- Can hold an entire half ton bin
- The most gentle feeding hopper on the market
- Easy to clean and maintain due to its simplistic design
- Continuous operation of up to 9 t/h
- Gentle vibration energy feeds grapes at a controlled rate

Equipment Details

- Made entirely of stainless steel 304
- Fork pockets for easy transport
- **Discharge chute width of 38”**
- **Fixed discharge elevation up to 98.5”**
- **Discharge height to be specified if raised frame is chosen**

MODEL
